Patrick J. Devlin Financial Secretary Treasurer Zane Walker

September 22, 2011

Hon. Hillary Rodham Clinton Secretary of State 2201 C Street, NW Washington, DC 20520

Dear Secretary Clinton:

There is no question that the United States is going to need affordable, reliable energy to get America's economy rolling again and to create more jobs. One of the most promising sources is to our North, as we import more oil from Canada than any other country. In fact, Canadian oil sands are the second-largest proven reserves on Earth. By 2035 Canada could double its oil exports to the United States and provide more than a third of the oil we import. It is a secure, stable, friendly source...and developing the U.S. pipelines to bring it here and the refineries to produce gasoline and heating oil will create real jobs here at home.

We understand that your Department is soliciting comments on the Keystone XL (KXL) pipeline project which would transport over 750,000 barrels per day of Canadian and North Dakota crude to American refineries. Alone, this project will create **20,000 jobs** for skilled craft workers, most paying family-supporting wages and benefits. This \$7 billion dollar project is "shovel-ready" and won't require any public investment.

Organizations like Greenpeace are spending millions of dollars to convince the Obama Administration to refrain from signing the border crossing permit for KXL. Imagine, with a signature, we can boost a lagging economy, increase energy security and create jobs for 20,000 hard-working Americans. In the long run, developing Canadian oil sands could create 342,000 American jobs over the next four years....and provide a \$34 billion dollar lift to the U.S. economy.

We are asking you to please support the Keystone XL pipeline. It means jobs for our skilled

members.

Sincerely,

Patrick J. Devlin Secretary-Treasurer

Zane P. Walker President
